Environment and Planning Review Tribunal
St. Francis Ravelin
Floriana

Dear Sir / Madam,

Appeal against refusal PA 4160/18 - Mdina

Please refer to the refusal given to the application submitted by my client Mr. Paul Falzon to carry out works at Mdina.

The only reason given to substantiate this decision is that the works have a negative impact on the footprint of a Grade 1 scheduled monument.

In our opinion these works i.e. deposition of inert material with a soil topping on existing field have absolutely no impact on the footprint of this monument for the simple reason that this deposition has been kept away from this footprint.

Furthermore the "monument" is a masonry bridge and hence whilst it may be of historical importance it cannot be considered as archeological remains as stated in the report. In any case the deposition of material does not disturb in any way any archeological remains.

Attached please find photographs which show the works. As you may note these works have no impact on the "monument" nor on the landscape value of the area.

However to ascertain yourselves of the impact of the works we would like to **request a site inspection.**

We would therefore like to respectfully request that you review this application after carrying out a site inspection and subsequently to approve our proposal.

Yours faithfully,

Charles Buhagiar A&CE.

Encl: Bank Receipt, Copy of refusal, site plan, photos of site
