9<sup>th</sup> March 2016

Your Ref:

Environmental and Planning Review  
P.O. Box 172  
Marsa

Application Number: PA 03781/15

Location: Site at Triq Ta' Lhudi, Zebbug, Malta

Proposal: Demolition of existing tool shed and new construction of basement and tool shed on the same footprint including sanctioning of timber canopy and corrugated sheeting canopy.

### Re: Request for Appeal

Further to the decision of the DCC to refuse the application in caption, the applicant would like to request an appeal of this decision for the following reasons.

Further to the refusal of development permission mentioned in caption dated 19th February 2016, the applicant would like to inform the authorities concerned that he has no objection to demolish the corrugated sheeting roof and the existing timber canopy mentioned in the recommendations of this report para 2, so that the application will be in conformity with Policy 2.5A of the Rural Policy and Design Guidance 2014 and Rural Objective 3 of the Sustainable Plan for Environment and Development 2015.

I trust that this proposal will be given its due consideration.

Carmen Sutton  
Architect and Civil Engineer
